Norwegian Scientific Committee for Food Safety

Comments from The Norwegian Scientific Committee for Food and Environment (VKM) on soybean DAS-81419-2 x DAS-44406-6 (EFSA-GMO-NL-2016-132)

VKM welcomes information on herbicide residue levels and their relevant metabolites in applications for herbicide tolerant GM-plants. Data on 2,4-D, glyphosate and glufosinate ammonium residue levels, including their relevant metabolites, in plant material from the presented field studies would support the assessment of food and feed safety.
