

Vitenskapskomiteen for mattrygghet
Norwegian Scientific Committee for Food Safety

Comments from The Norwegian Scientific Committee for Food Safety (VKM) on the renewal application for the maize event GA21 (EFSA-GMO-RX-005)

VKM welcomes information on herbicide residue levels and their relevant metabolites in applications for herbicide tolerant GM-plants. Data on glyphosate residue levels, including relevant metabolites, in plant material from the presented field studies would support the risk assessment of food and feed safety.
