

# Comments from The Norwegian Scientific Committee for Food and Environment (VKM) on Maize Event MON 87429 (Application EFSA-GMO-NL-2019-161)

## **Food and feed safety assessment**

VKM welcomes information on herbicide residue levels and their relevant metabolites in applications for herbicide tolerant GM-plants. Data on glufosinate, dicamba, quizalofop, glyphosate and 2,4-D herbicide residue levels, including relevant metabolites, in plant material from the field studies would support the assessment of food, feed, and environmental safety.
